EDUCATION

Columbia University, M.S. in Computer Science, New York, NY *Expected Graduation December 2015*

- Coursework: software analysis, cryptography, machine learning and distributed systems.

University of Brasilia, B.S. in Computer Science, Brazil *August 2009 - July 2014*

- Enrolled as an **Exchange Student** in 2012 at Michigan State University.

Toastmasters International, Competent Communication Award, USA *January 2012 - December 2012*

EXPERIENCE

Google, Software Engineer Intern, New York City, NY, full-time *May 2015 - Present*

- Participating in the replacement of a critical legacy system in the Google corporate infrastructure.
- Developed a service in Go that provides the link between different host and corporate device identifiers.
- Preparing this service for production launch: handling concerns such as monitoring, logging and error handling.

University of Brasilia, Undergraduate Researcher, Brazil, undergraduate thesis *September 2013 - May 2014*

- Studied distributed systems, consistency, and fault tolerance.
- Developed a consistent and reconfigurable distributed memory without consensus algorithm in Go.
- Open sourced the whole project in github.com/mateusbraga/freestore.
- Won the award of best article in the Brazilian XV Test and Fault Tolerance Workshop.

GE Aviation, Software Engineer Intern, East Lansing, MI, capstone project *September 2012 - December 2012*

- Participated in the development of a ultra-high-resolution satellite imagery viewer for iPad.
- Managed the team of 3 students in this Michigan State University senior capstone course.
- Contributed as developer, the point of contact with the client, and project manager.

Norfolk Southern, Software Engineer Intern, Atlanta, GA, full-time *May 2012 - August 2012*

- Participated in a team of 5 in the development of backend programs to handle train health data from detectors.
- Developed inference code in Java to identify trains based on distance between axles.
- Integrated Java and C/C++ programs using JNI.
- Developed a controller in C for the subsystems of the project.

CJR Junior Enterprise, Director of Information Technology, Brazil, volunteer *July 2011 - December 2011*

- Directed a team of 8 in the information technology management of the enterprise.
- Improved the server backup process by automating it with Amazon Web Services.
- Adapted the software development process by making it more suitable to the context of a Junior Enterprise.
- Promoted the use of MediaWiki as a mean to share knowledge inside the enterprise.

University of Brasilia, Undergraduate Researcher, Brazil, part-time *July 2011 - December 2011*

- Developed an understanding of information security through the project: Trust Models for Computer Security.
- Briefly analyzed the information security standard ISO/IEC 27002.

SKILLS

Programming Languages: Go, Java, C, Python.

Libraries/APIs: SQL, Redis, OpenSSL, Amazon S3, Google App Engine, OAuth, Youtube API, SIP.

Tools: Git, Docker, Virtualbox, Travis CI.

Architectures: Microservices, Cloud, Replication.
